GRZIMEK'S

ANIMAL LIFE

The world's leading source on animals online

This fall, the acclaimed 17-volume *Grzimek's Animal Life Encyclopedia* — considered the best and most comprehensive animal reference available today — will be transformed into an interactive, media-rich, community-oriented, online interface. Look for these fascinating features:

Animals: from aardvark to zorilla

- **Animals A-Z** — unparalleled coverage of more than 4,000 species (evolution, habitat, behavior, range and more)
- **Authoritative content** — up-to-date information written and reviewed by the world's experts
- **Intuitive and credible** — letting kids explore and learn while supporting serious academic research
- **Media rich** — photos, maps, videos, interactive gadgets and more linked to periodicals, real-time news and websites
- **User-friendly interface** — engaging features such as Search Assist, Animal Finder, Read Speaker and the ability to create citations and to print, email and download content

Recent enhancements

- **Community connection** — upload photos, share travel stories and exchange research results and other information
- **Curriculum correlation** — content corresponds to national science curriculum
- **Critical thinking** — discover opposing viewpoints about zoos, animal rights and more
- **More than animals** — find a world of animal-related information (biomes, prehistoric animals and more)

The screenshot shows the Grzimek's Animal Life Encyclopedia website interface. At the top, there's a search bar and the site logo. The main content area is for the 'Panthera leo (Lion)'. It features a large, high-quality photograph of a lion's face with its mouth open, roaring. Below the photo, there's a 'Physical Characteristics' section with text and a 'Distribution' section with a world map highlighting the lion's range in Africa and Asia. To the right of the main text, there are several sidebars: 'Share Your Life' with a globe icon, 'Related Links' with a list of external resources, and 'Share Your Life' with a grid of small images. The bottom of the page has a navigation menu and the Gale logo.

Grzimek's Animal Life offers unequalled coverage of species categorized by Amphibians, Birds, Fish, Insects, Invertebrates, Mammals and Reptiles.
